WORLDWIDE ROTOMOULDER

since 1949

Roto Group is an international company specialized in the production of plastic products. The roots of the family-run business go back to 1949. The headquarters is in the Slovenia. Production is organized in 8 factories in European countries and 1 in Africa. The company employs more than 600 people and had revenues of 110 mio euro. ROTO exports its products to 65 countries all around the world. Run by the Pavlinjek family, the company has established a reputation as a reliable business partner.

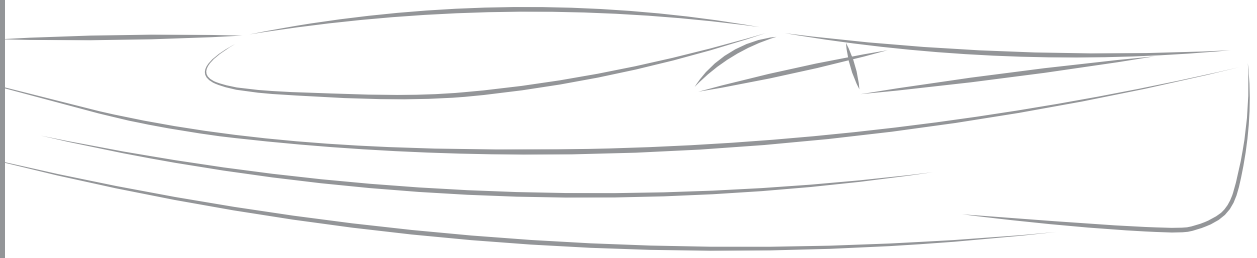

ROTO manufactures more than 4,400 different products using rotational molding technology. Indeed, ROTO is one of the market leaders in its industry. It has been responsible for many innovations in plastic- molding technology. The R&D department has made numerous innovations in product design, materials and production technologies.

The company's main production segments are final products for sport, nautic, agriculture, ecology, gardening. Using plastics composites and the latest production technologies, ROTO also makes kayaks, canoes and high-performance boats.

Manufacturing as a custom molder, ROTO serves a wide variety of industry sectors including construction, automotive, nautical, logistics, aquaculture and agricultural machinery. Its custom-molded products include fuel and water tanks for motorcycles, tractors, trucks, sailing boats and motorboats, caravans and motorhomes, and components for many different machines.

ROTO works to increase its products' value by enhancing their design, intelligently using materials and modern production technologies, and ensuring a high-quality nish. The company also takes great pride in its after-sales service and customer technical support.

save the nature
recycle your old kayak/canoe

Benjamin Savšek - Roto ambassador of PeCycled kayaks and canoes

Return your old kayaks and canoes to Roto

We can recycle them and produce new products. You will save the nature and receive discount by buying new rotoAttivo kayaks and canoes.

100%
PE RECYCLED

RECYCLING AND SUSTAINABILITY

The Roto Group has been recycling polyethylene for over 30 years. We buy waste polyethylene on the market and recycle our used products that we get from customers 100%. In the past, we used these materials again to make garden furniture and planters.

This year we started producing a special **PE cycled line** of kayaks and canoes. In our laboratory, we produce material from recycled packaging, which is collected from the nature during ecological campaigns. Waste packaging is supplied to us also by shops and other factories.

We care for the future generations. We do everything we can to protect a clean environment.

KAYAK CANOE

SEE SEA

A innovative new transparent kayak offers a unique experience on the water, providing a clear view beneath the surface. Its innovative design combines functionality, comfort, and a closer connection with the underwater world.

SEE SEA

See Sea it's more than just a kayak, this innovation transforms paddling into an immersive experience — connecting people with the water in a completely new way. Built for adventure. Designed to be seen. Created to experience more.

New innovative kayak provides high impact resistance, reduces potential weak points and makes the kayak easy to maintain. Designed with real users in mind, it is suitable for leisure activities, rental fleets, resorts, hotels and guided water experiences.

SEE SEA

A background image of a river with a rocky bank and reeds. The water is calm, reflecting the surrounding greenery and rocks. The scene is peaceful and natural.

CANOE

RotoAttivo canoes are high-quality, durable polyethylene kayaks designed for recreational paddling, fishing, and adventurous excursions.

Robust and lightweight, they resist impacts, making them ideal for rivers, lakes, and even coastal waters. Featuring ergonomic designs for comfort, spacious interiors, and excellent stability, RotoAttivo canoes cater to both beginners and experienced paddlers.

CANADIER 525

The Canadier 525 is a classic open canoe crafted from durable 3-layer polyethylene. It offers versatility with options for both plastic and wooden seats.

The plastic seats feature built-in storage compartments, enhancing practicality. Lightweight and equipped with integrated handles, this canoe is easily transported.

Stable and spacious, the Canadier 525 is ideal for recreational paddling, exploration, or rental services. Moreover, it can be sustainably produced using PeCylcled, our recycled material.

KAYAK PIONEER

MIKE “NECKY” NECKAR

Delsyk kayaks are designed by Mike “Necky” Neckar, a designer and manufacturer of **Delsyk Design kayaks**. Mike is considered one of the most brilliant designers, who has poured over 30 years of experience into perfect results. Thanks to his skills, kayaks of the highest quality and excellent lines are created.

The salt spray kissed Mike “Necky” Neckar’s face as he wrestled another prototype kayak onto the roof of his battered pickup truck. The year was 1970s British Columbia CANADA, a time when fiberglass reigned supreme in the world of kayaking. Neckar, a restless spirit with a knack for tinkering, believed there had to be a better way. He dreamt of kayaks that were tough, affordable, and accessible to everyone, not just elite paddlers.

He began experimenting with polyethylene, a relatively new material at the time. He pushed the boundaries of what was possible, defying conventional wisdom and pushing the limits of kayak design.

His creations were unlike anything seen before. They were robust, yet surprisingly

light. They tracked effortlessly through the water, responsive to the slightest shift in weight. And perhaps most importantly, they were affordable, bringing the joy of kayaking to a wider audience.

Neckar wasn’t just a designer; he was a true craftsman, a visionary who saw the potential in this revolutionary material. He poured his heart and soul into every kayak, meticulously considering every detail, from the ergonomics of the seat to the subtle curves of the hull.

His innovations weren’t just about performance; they were about accessibility. He wanted to create kayaks that would inspire a love of paddling in everyone, from seasoned adventurers to curious beginners. And he succeeded.

Decades later, the legacy of Mike “Necky” Neckar lives on in every kayak that bears Delsyk name. His innovative designs continue to inspire a new generation of paddlers, reminding us that with passion, ingenuity, and a touch of rebellious spirit, we can all make a lasting impact on the world.

ORMEN LV

Ormen LV is a stable recreational kayak for beginner to intermediate paddlers to build confidence and develop skills. This low volume kayak has a comfortable and generous sized cockpit making it easier to enter and exit the boat. Short length keeps it maneuverable and also very easy to handle outside the water. Best suited for day-touring and kayaking on inland waters.

Ormen series kayaks are equipped with SmartTrack rudder and retractable skeg. Ormen LV, MV and HV are available in single-layer HDPE.

ORMEN HV

Ormen HV is a great recreational touring kayak with an excellent glide and maneuverability. This kayak is an efficient kayak that maintains speed very well and has good acceleration. The hard chine hull provides greater initial stability and good maneuverability. Ormen high volume is designed to fit the larger paddler.

Ormen series kayaks are equipped with SmartTrack rudder and retractable skeg. Ormen LV, MV and HV are available in single-layer HDPE.

ORMEN MV

Ormen MV is a recreational kayak with superb maneuverability and good tracking. The hull type provides greater initial stability and a fair amount of speed. It is well suited for touring and coastal adventures with enough storage capacity for overnight and weekend trips.

Ormen series kayaks are equipped with SmartTrack rudder and retractable skeg. Ormen LV, MV and HV are available in single-layer HDPE.

YOUR JOURNEY

YOUR KAYAK

YOUR FREEDOM

REVAL LV / MV

Reval kayaks are British style kayaks with slightly more volume. Reval series kayaks have superb stability and performance in all sea conditions. These kayaks are responsive and really easy to turn. The hull is designed with rocker and upswept bow and stern. The initial stability of Reval kayaks is a little higher, providing a secure feeling. Reval is a superb sea touring kayak suitable for paddlers who are looking for a nice British style kayak that can handle more challenging sea conditions.

Reval LV (PE) is the lowest volume kayak in the series. LV is perfect for a medium sized paddler who wants to enjoy a roomier cockpit area. The LV cockpit with thigh braces provides an easier entry and good support. The kayak deck is equipped with 1 oval hatch, 1 round hatch, and a day-hatch for easier access into compartments.

Reval MV PE has slightly more volume than the LV version, which makes it well suited for weekend-trips and shorter expeditions. Reval MV is a tough kayak ideal for all adrenaline seekers. The MV is responsive and wonderfully stable even in breaking waves and strong winds. The kayak deck is equipped with 1 oval hatch, 1 round hatch, a mini box in the front and a day-hatch for easier access into compartments.

PLAY LV / MV

Arrow Play series kayaks are all performance sea kayaks, developed specially for maneuvering and playing on the sea. These kayaks are also excellent for day trips and longer overnight getaways. The hull has significant rocker and volume in the bow to avoid diving when riding down the wave. The mid-section has a slightly rounded profile, making it very smooth from edge to edge. This combined with the hard chines make the Play a joy to paddle whether you enjoy the rough stuff or just want a sea kayak that responds instantly to your moves. The Play series has proven to be our most popular sea kayaks in Scandinavia. Play series deck is smooth with soft lines; especially the front deck, which will catch less wind.

The **Play LV** PE is the smallest kayak in the Play series and is suitable for smaller paddlers. Play LV still offers plenty of storage for longer trips.

Play MV PE has a slightly raised deck compared to the Play LV for more comfort and room in the cockpit. The key selling point for the Play MV is versatility – it fits a wide range of paddlers in almost all skill levels.

SEA KAYAK

NUKA MV

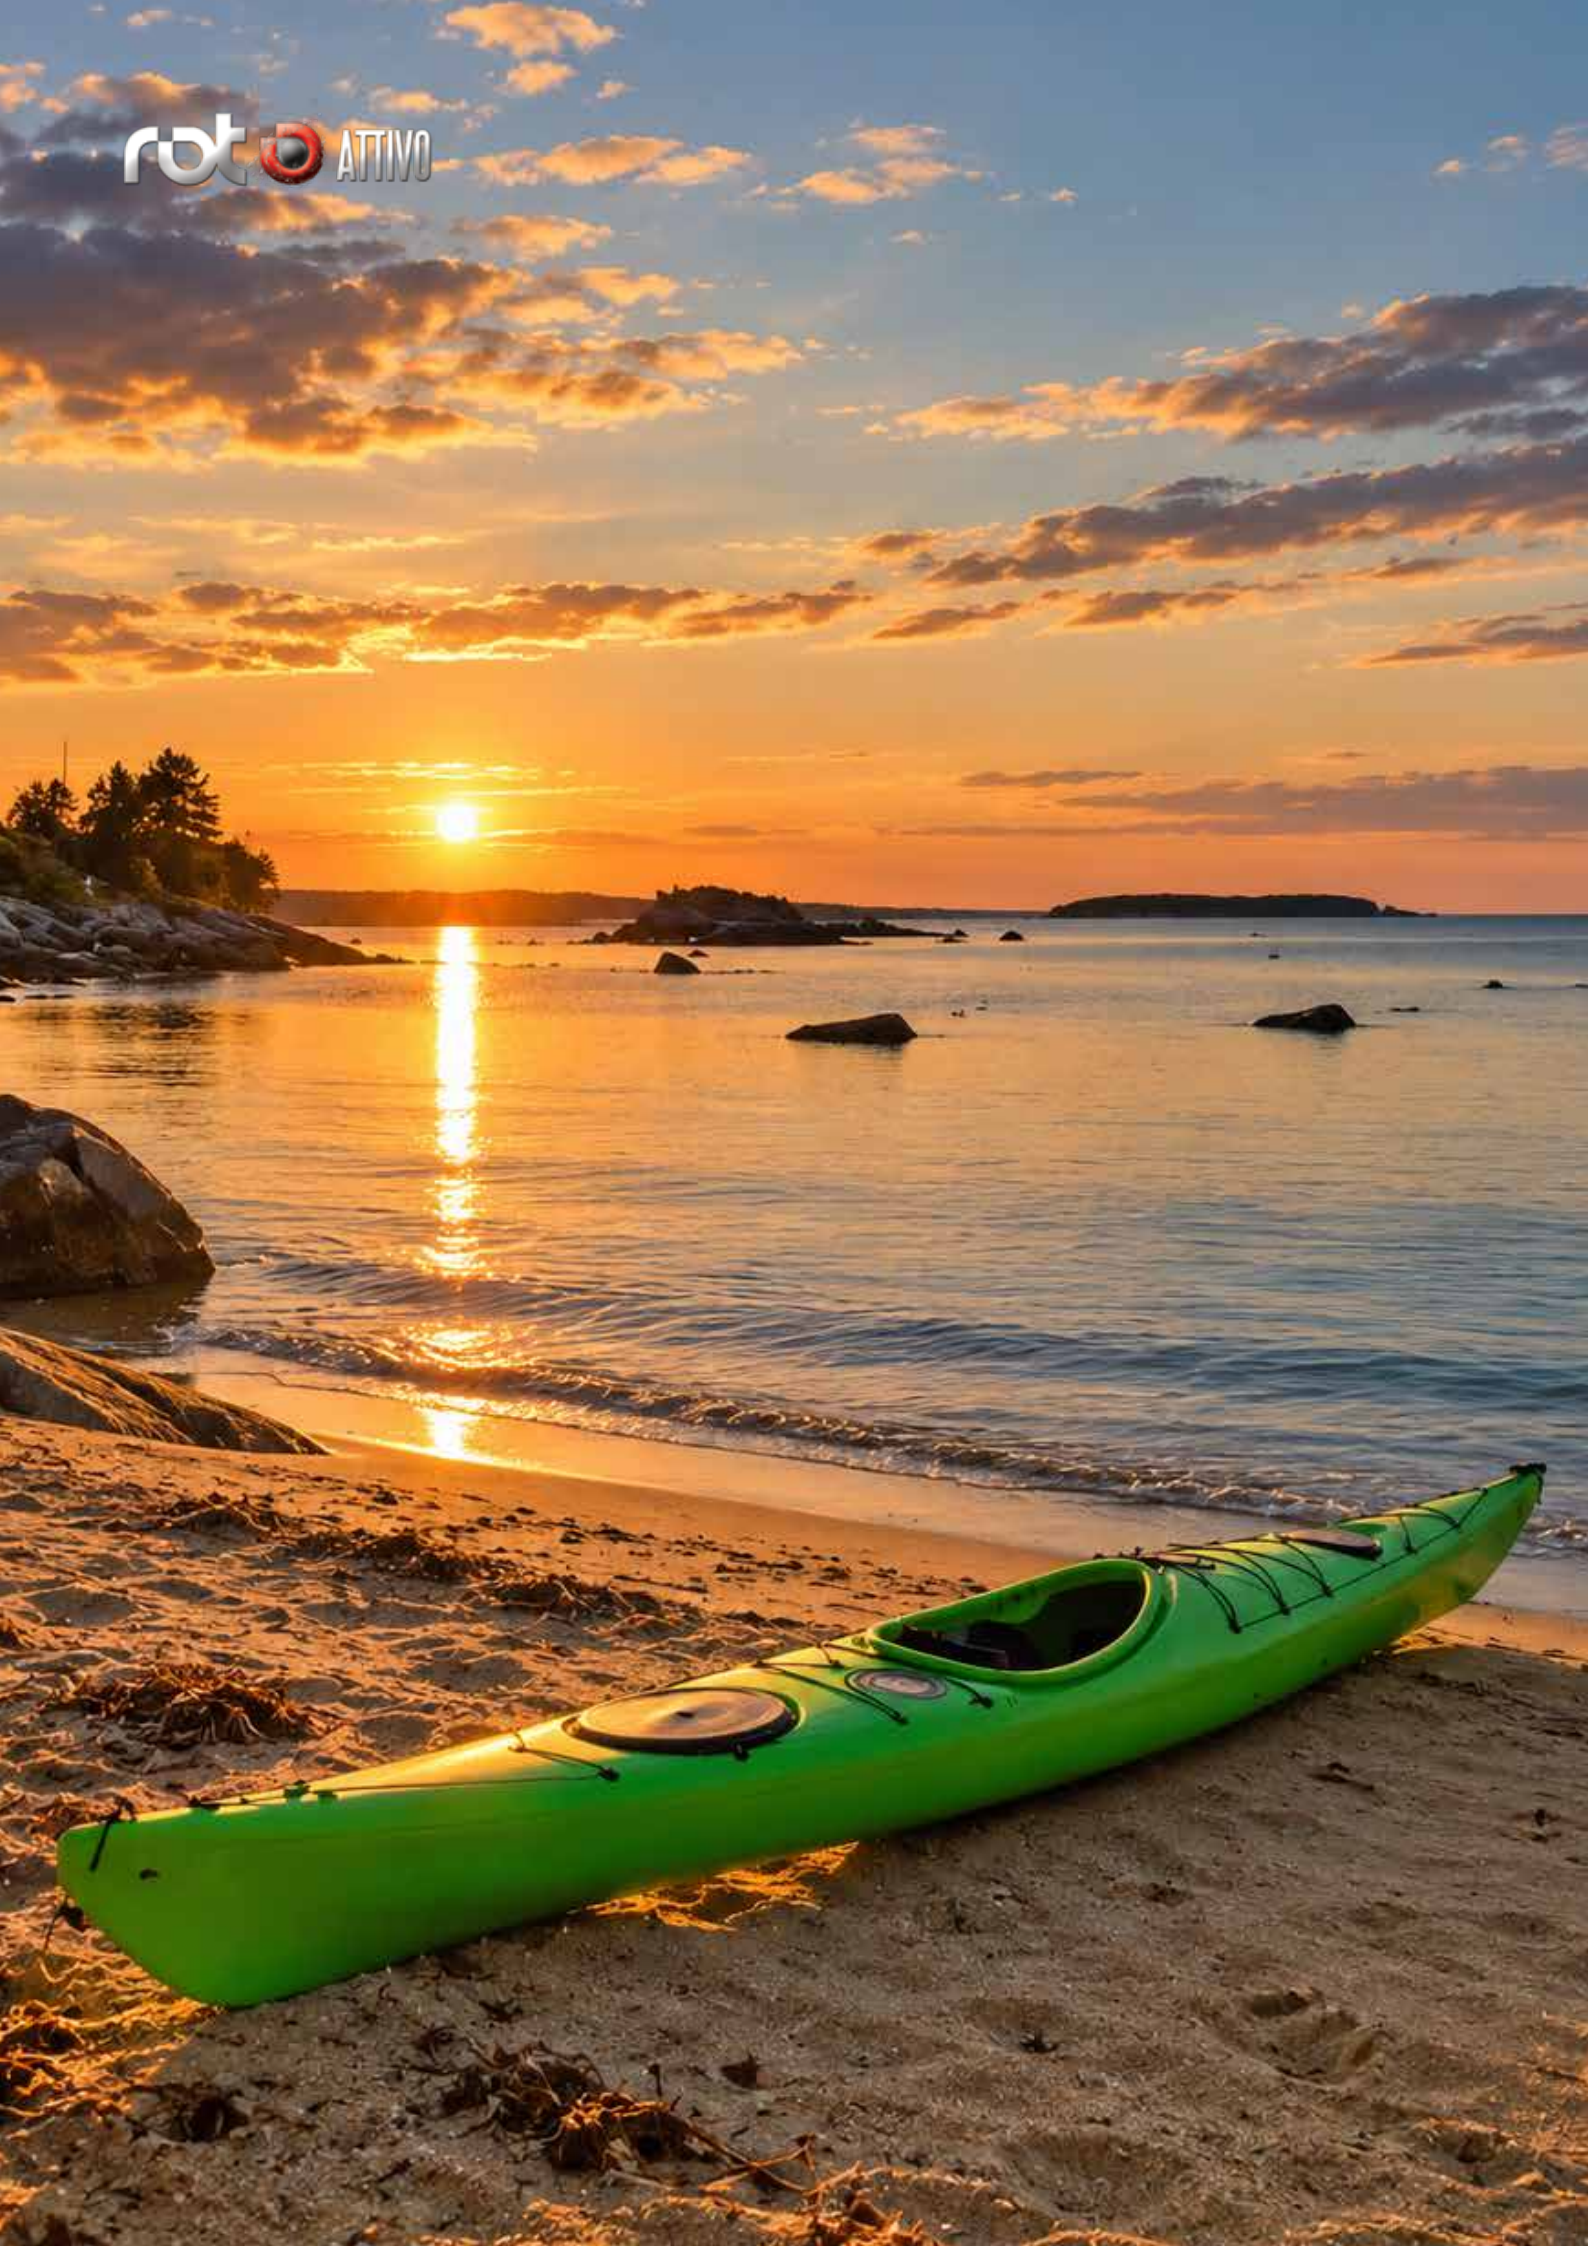

The Nuka MV PE is a straight line speed optimized sea kayak for smaller paddlers. It has rounded hull for less resistance and less wetted surface, making it glide very well through the water. The Arrow Nuka MV PE is a touring kayak and has much practical deck line layout. The rear hatch is oval making it easy to load the kayak on overnight trips. The Nuka MV PE has less rocker and more raking bow and stern which increases the waterline when loaded.

The Nuka MV PE is equipped with a retractable skeg and can be easily fitted with a rudder for those who prefer to focus forward momentum rather than the correction strokes and edging.

RECREATIONAL

RotoAttivo recreational kayak are user-friendly, stable, and versatile watercraft designed for casual paddling on calm waters such as lakes, slow-moving rivers, and coastal areas. These kayaks feature a wide hull for enhanced stability, making them ideal for beginners or those seeking a relaxed experience. They prioritize ease of use, comfort, and affordability over speed or advanced performance, making them perfect for leisure activities, wildlife observation, or short paddling trips.

TUKTU 315

Delsyk Tuktu is a highly stable touring kayak perfect for beginners, offering easy and safe navigation on the water. It's ideal for weekend trips or even just a few hours after work. The Tuktu boasts an exceptionally well-designed cockpit and comfortable seating. The backrest can be adjusted both in height and angle, while the thigh rests can also be adjusted (seat angle). The large cockpit opening is suitable for larger individuals (up to 135 kg) and is especially comfortable for anglers or photographers. The angled sides allow for efficient paddling and maneuvering on the water. It holds its course very well, even on lakes in windy conditions or against waves. Weighing only an impressive 19 kg, the Tuktu is easy to transport and carry. Thanks to the waterproof rear compartment, you can pack luggage in the Tuktu. Enjoy both fun and comfort with this kayak.

LENGTH / WIDTH	315 cm / 68 cm

JAMAICA

2-SEATED

The Jamaica Base is a highly stable tandem kayak, perfect for families of up to three. With its semi-open hull, easy entry and exit, and splash protection, it's ideal for calm waters like lakes, rivers, and beach days. Enjoy a comfortable paddling experience with space for one child (or pet) between two adults.

The kayak's unique semi-open hull allows for easy entry and exit while offering better splash protection than a fully open sit-on-top kayak. This design eliminates the need for a splash apron, making it more convenient and comfortable.

SIT ON TOP

RotoAttivo sit-on-top kayaks are an open-deck kayaks designed for ease of use, comfort, and versatility, making the ideal for beginners and recreational paddlers. Unlike traditional kayaks, it has no enclosed cockpit, allowing paddlers to sit on top of the hull. This design provides excellent stability, easy entry and exit, and reduces the risk of feeling confined. They are suitable for warm climates, fishing, or activities where getting wet is part of the fun. They are perfect for calm waters, coastal areas, and short paddling adventures.

SIT ON TOP

VIS 260 / 290

Sit on top kayak with great sailing compatibility and stability. Vis 260 and 290 twin kayaks with the same shapes but different sizes. The vis 260 is a smaller model oriented more towards smaller paddlers or women. The Vis 290 is a bigger kayak, which also has a dry compartment in the middle.

WILD WATER

A wild water kayak is a specialized performance kayak designed for navigating fast-moving, turbulent whitewater rivers and rapids. It features a narrow, streamlined hull for speed and agility, allowing paddlers to maneuver quickly in challenging water conditions. Typically shorter than other kayak types, wild water kayaks have a planing or displacement hull, providing excellent control and responsiveness.

ORGASMO 255

ICF certified kayak, designed after years of testing and research. A perfect mix of elements, the kayak Orgasmo is the benchmark for wildwater competitions for hundreds of rivers around the world. Sitting in the Orgasmo, you will never believe the kayak is 255 cm long. Everything is designed for maximum connection of a paddler with a kayak. The Ergonomic seat, large and deep thigh brace and adjustable backrest will instantly put you in the shoes of whitewater paddling.

HYDRA

HYDRA 450/530

Stable. Reliable. Easy to handle.

The "Hydra450" motorboat is setting new standards in the rotational molding boat industry.

Its ergonomic design ensures exceptional versatility, making it ideal for families, fishermen, professionals like firefighters and rescue divers and sailing school instructors seeking a reliable and safe training vessel.

The Hydra450 is available in several versions with a side console, central console or without a console.

It is a one-piece rotationally molded boat, manufactured in 3-layer sandwich

technology. This unique production concept ensures the hull's exceptional rigidity, high impact resistance, and lightweight properties."

Compared to the boats made in GRP technology, polyethylene boats can use engines with less power to achieve same speed and performance. The 3-layer polyethylene material provides also amazing buoyancy, UV stability, and has low maintenance costs.

"Hydra450" motorboats are 100% recyclable and also have an option to be made from recycled materials.

KORKYRA 650

KORKYRA 650

Designed for confidence.

Engineered for superior stability.

The design of the “Korkyra650” catamaran is elegant, modern and expresses confidence on the water. This vessel will excite both, experienced sailors and adventurous beginners.

“Korkyra” catamarans are made from “multi-hull rotationally molded floaters” connected with the rigid aluminum sandwich platform. The combined structure enables cost

efficient container shipping also available in disassembled form.

The main floaters are manufactured in one shot molding using unique 3-layer technology. The high-performance double hull is characterized by exceptional rigidity, high impact resistance and low weight.

All components of the catamaran are UV-resistant and fully recyclable at the end of their lifecycle, ensuring sustainability without compromising performance.

ZVEZA
SLOVENIJE

Soča is a 137-kilometre long river that flows through western Slovenia and east Italy. An Alpine river in character, its source lies in the Trenta Valley in the Julian Alps. Soča is one of the most beautiful rivers in Europe, an important natural treasure in the Triglav National Park. It is famous for its deep emerald colour and brisk rapids in the upstream area. The Soča River is a veritable paradise for water sports enthusiasts, particularly fans of kayaking and fishing, as well as photographers and people looking to relax in natural surroundings.

Visit Slovenia and discover Soča.
